

Thriving in Australia's harshest climates, the Envire range is resistant to termites, rot, water and sun damage, and has three times the life span of timber.

OUTDOOR RANGE:

BOLLARDS | FURNITURE | BOARDWALKS | RETAINING WALLS

Envire[®]
PARKSCAPE

>> ABOUT ENVIRE

A sustainable future depends on many things, not the least is innovation. Introducing modular, light weight, noise inhibiting panels with engineering integrity.

NOISEWALL APPLICATIONS:

ROADWAYS | RAIL CORRIDORS | INDUSTRIAL SITES

NOISE
BARRIER WALL

>> ABOUT NOISEWALL

The Duratrack sleeper project is a great example of how government, industry, universities and rail authorities can work together to create a circular economy.

TYPE APPROVED: MTM | V/LINE

Our goal is to have a broad and long-lasting impact on sustainability in the infrastructure sector.

Applying Science to Sustainability

Integrated Recycling developed the science to transform waste plastics into a tough and extremely durable material called Polytensilate. Made from 85% polyethylene and polystyrene plastics and 5% recycled organic fibre, Polytensilate is used to manufacture the Integrated Recycling product ranges.
